

SAKSHAM SINGH SACHAN

B.Tech CSE Student — Security Researcher

sssachan2009@gmail.com | [GitHub](#) | [LinkedIn](#) | [Twitter](#) | [Website](#)

Education

B.Tech in Computer Science and Engineering (Present)
CSJMU UIET (formerly Kanpur University)

Achievements

- Lichess rating: **2300–2400**
- Chess.com rating: **1930–2000**

Technical Skills

Languages: JavaScript/TypeScript, C/C++, Java, Bash, HTML/CSS

CyberSecurity: Offensive Security, Application Security (Web/API), Vulnerability Research, Threat Intelligence, OSINT, Attack Surface Management (ASM), Threat Hunting, Secure Code Review, Authentication & Authorization Testing, Business Logic Testing, API Security, IDOR & Access Control Analysis, Reconnaissance Automation, Detection Engineering, MITRE ATT&CK, Burp Suite, Nmap, ffuf, Nuclei, Metasploit, Wireshark, Ghidra

Web & Backend: React, Tailwind CSS, Node.js, Express, MongoDB, Postgres, MySQL, SQLite, Drizzle, Prisma

Systems & DevOps: Linux (Arch/Debian/Kali), Docker, Kubernetes, Git, GitHub Actions, CI/CD, NGINX, Caddy, GCP, DigitalOcean, Fly.io

Certifications

- **Arch1001: x86-64 Assembly** – OpenSecurityTraining2 *Jul 2026*
- **Ethical Hacker** – Cisco *Jun 2026*
- **Introduction to Cybersecurity** – Cisco *Jun 2026*

Experience

Security Researcher – Independent Vulnerability Research

Jun 2026 – Present

- **CSJMU – Critical OTP Bypass (Account Takeover)**

Discovered OTP bypass vulnerability in CSJMU authentication system enabling complete account takeover without valid OTP verification. Identified logical flaws in OTP validation workflow and submitted responsible disclosure report to university authorities.

- **ISRO – IDOR Vulnerability**

Identified Insecure Direct Object Reference (IDOR) vulnerability in ISRO web property allowing unauthorized access to sensitive resources. Conducted security testing and submitted detailed vulnerability report through responsible disclosure channels.

- **Rapido – Broken Link Authorization (Brand Impersonation)**

Discovered broken link authorization vulnerability enabling creation of Twitter account with official Rapido handle. Account verified by users as legitimate, receiving tags and engagement intended for official Rapido account. Reported to Rapido security team for remediation.

- **IIT Kanpur – Web Security Vulnerability**

Identified and responsibly disclosed security vulnerability in IIT Kanpur web property. Report acknowledged by IIT Kanpur professor, demonstrating recognition of security finding.

ISRO Training & Research

ISRO Training Programmes:

- **AI/ML for Geodata Analysis** *ISRO — Aug 03–14, 2026*
- **Earth Observations for Tropical Cyclone Monitoring** *ISRO — Jul 30, 2026*
- **Aerosols: Measurement, Retrieval and Impacts** *ISRO — Jul 27–28, 2026*

Interests: Astrophysics, Atmospheric Science, Computational Physics, Earth Observation

Projects

SSOS – Custom Operating System

- Building custom OS from scratch; working on kernel development, memory management, process management, interrupts, system calls.

AI Resume Shortlisting System

- AI-powered prototype for automated resume analysis and candidate shortlisting.
