SAKSHAM SINGH SACHAN

B.Tech CSE Student | Security Researcher | Astrophysics Research

sssachan2009@gmail.com | GitHub | LinkedIn | Twitter | Website

Astrophysics Research & Recognition

Invited Speaker – ASTROPHYSICS2027 Summit *Florence, Italy*

- Received a speaker invitation based on independent astrophysics research work for the ASTROPHYSICS2027 Summit in Florence, Italy.
- Research interests include astrophysics theory, cosmology, and computational physics.

Education

B.Tech in Computer Science and Engineering **Present**

CSJMU UIET, Kanpur

Achievements

- Lichess rating: **2300–2400**
- Chess.com rating: **1930–2000**

Technical Skills

Languages: JavaScript, HTML, CSS
Cybersecurity: Offensive Security, Web/API Security, Vulnerability Research, Threat Intelligence, OSINT, Attack Surface Management, Threat Hunting, Secure Code Review, Authentication and Authorization Testing, Business Logic Testing, IDOR, Access Control Analysis, Reconnaissance Automation, Detection Engineering
Security Tools: Burp Suite, Nmap, ffuf, Nuclei, Metasploit, Wireshark, Ghidra
Web and Backend: React, Node.js, Express.js, MongoDB
Systems and DevOps: Linux (Arch, Debian, Kali), Docker, Git, GitHub Actions

Certifications

- **Arch1001: x86-64 Assembly** – OpenSecurityTraining2 *Jul 2026*
- **Ethical Hacker** – Cisco *Jun 2026*
- **Introduction to Cybersecurity** – Cisco *Jun 2026*

Experience

Machine Learning Intern – Auspify Technologies **Oct 23, 2026 – Nov 23, 2026**

- Undertaking a machine learning internship focused on practical machine learning projects and applications.
- Applying programming and analytical skills to support machine learning development and project workflows.

Security Research Experience

Independent Security Researcher **Jun 2026 – Present**

- **CSJMU – OTP Validation Bypass and IDOR**
  Identified an OTP validation logic flaw and an IDOR vulnerability that could potentially enable unauthorized access to records of students admitted in 2026. Reported the findings to university authorities.
- **ISRO – Insecure Direct Object Reference (IDOR)**
  Identified and responsibly reported an IDOR vulnerability affecting an ISRO web property.
- **Stanford – Security Vulnerability**
  Identified a security vulnerability and reported the finding. Technical details are withheld due to disclosure considerations.
- **NASA – P2-Category Security Finding**
  Reported a P2-category security issue affecting a NASA web property. The issue was remediated before review, and the report was closed as already fixed.
- **Rapido – Social Media Link Security**
  Identified and reported a broken social-media link issue that could enable misuse of the brand's official social-media identity.
- **IIT Kanpur – Web Security Vulnerabilities**
  Identified and responsibly disclosed web security issues to IIT Kanpur authorities.
- **SARAS AI – P2-Category Security Finding**
  Reported a P2-category security issue affecting a SARAS AI web property through responsible disclosure.
- **HackerHub8 – P4-Category Security Finding**
  Identified and reported a P4-category security issue through responsible security testing.
- **Dentira, LPU and DTU – P4-Category Findings**
  Identified and reported security findings affecting web properties associated with Dentira, LPU, and DTU through responsible vulnerability disclosure.

ISRO Training & Research

- **AI/ML for Geodata Analysis** *ISRO | Aug 03–14, 2026*
- **Earth Observations for Tropical Cyclone Monitoring** *ISRO | Jul 30, 2026*
- **Aerosols: Measurement, Retrieval and Impacts** *ISRO | Jul 27–28, 2026*

Research Interests: Astrophysics, Atmospheric Science, Computational Physics, Earth Observation

Projects

KisanSetu – Farm-to-Consumer Digital Marketplace **SIH 2026 | PS26033**

- Developed a full-stack digital marketplace connecting farmers directly with consumers and supporting product discovery, listings, and transactions.
- Built using React, Node.js, Express.js, and MongoDB.

AarogyaCase – Patient Case-Taking Software **SIH 2026 | PS26047**

- Developed a digital patient case-taking solution for structured clinical data collection and streamlined healthcare workflows.
- Designed backend workflows using Express.js and PostgreSQL.

SSOS – Custom Operating System

- Developing a custom operating system, exploring kernel development, memory management, process management, interrupts, and system calls.

AI Resume Shortlisting System

- Developed an AI-powered prototype for resume analysis and candidate shortlisting.
