

SAKSHAM SINGH SACHAN

B.Tech CSE Student | Security Researcher

sssachan2009@gmail.com | [GitHub](#) | [LinkedIn](#) | [Twitter](#) | [Website](#)

Education

B.Tech in Computer Science and Engineering Present

CSJMU UIET (formerly Kanpur University)

Achievements

- Lichess rating: **2300–2400**
- Chess.com rating: **1930–2000**

Technical Skills

Languages: JavaScript, HTML/CSS

Cybersecurity: Offensive Security, Web/API Security, Vulnerability Research, Threat Intelligence, OSINT, Attack Surface Management, Threat Hunting, Secure Code Review, Authentication & Authorization Testing, Business Logic Testing, API Security, IDOR & Access Control Analysis, Reconnaissance Automation, Detection Engineering, MITRE ATT&CK

Security Tools: Burp Suite, Nmap, ffuf, Nuclei, Metasploit, Wireshark, Ghidra

Web & Backend: React, Node.js, Express, MongoDB

Systems & DevOps: Linux (Arch/Debian/Kali), Docker, Kubernetes, Git, GitHub Actions, CI/CD, NGINX, Caddy, GCP, DigitalOcean, Fly.io

Certifications

- **Arch1001: x86-64 Assembly** – OpenSecurityTraining2 *Jul 2026*
- **Ethical Hacker** – Cisco *Jun 2026*
- **Introduction to Cybersecurity** – Cisco *Jun 2026*

Experience

Security Researcher – Independent Vulnerability Research

Jun 2026 – Present

- **CSJMU – OTP Bypass / Account Takeover + IDOR**

Identified a logical flaw in the OTP validation workflow that could allow authentication without valid OTP verification also IDOR which allows mass download data of all 2026 admitted students. Reported the finding responsibly to university authorities.

- **ISRO – IDOR**

Identified an Insecure Direct Object Reference (IDOR) vulnerability in an ISRO web property that could allow unauthorized access to resources. Submitted a detailed responsible disclosure report.

- **Stanford**

Identified a vulnerability but can't disclose it publicly

- **NASA – P2 Vulnerability**

Identified a **P2-category security vulnerability** in a NASA web property and prepared a responsible disclosure report. The affected issue was remediated before the report was reviewed, after which the submission was closed as already fixed.

- **Rapido – Broken Link Authorization / Brand Impersonation**

Identified a broken-link authorization issue that enabled creation of a social-media account using the official Rapido handle. Reported the issue to the Rapido security team for remediation.

- **IIT Kanpur – Web Security Vulnerability**

Identified and responsibly disclosed several security vulnerability in an IIT Kanpur web property. The finding was acknowledged by IIT Kanpur authorities.

- **DTU – P4 Vulnerability**

Identified and reported a **P4-category security vulnerability** in a DTU web property through security research and responsible disclosure.

- **LPU – P4 Vulnerability**

Identified and reported a **P4-category security vulnerability** in an LPU web property through responsible security testing.

- **Dentira – P4 Vulnerability**

Identified and reported a **P4-category vulnerability** in Dentira through responsible vulnerability disclosure.

ISRO Training & Research

ISRO Training Programmes:

- **AI/ML for Geodata Analysis**
- **Earth Observations for Tropical Cyclone Monitoring**
- **Aerosols: Measurement, Retrieval and Impacts**

ISRO | Aug 03–14, 2026

ISRO | Jul 30, 2026

ISRO | Jul 27–28, 2026

Interests: Astrophysics, Atmospheric Science, Computational Physics, Earth Observation

Projects

KisanSetu – Farm-to-Consumer Digital Marketplace

SIH 2026 | PS26033

- Developed a full-stack digital marketplace designed to connect farmers directly with consumers and streamline product discovery, listings, and transactions.
- Built the application using React, Node.js, Express, and MongoDB, with modular architecture for marketplace and user workflows.

AarogyaCase – Patient Case-Taking Software

SIH 2026 | PS26047

- Developed a digital patient case-taking and management solution for structured clinical data collection and streamlined healthcare workflows.
- Designed the backend around Express and PostgreSQL with structured data management and case-record workflows.

SSOS – Custom Operating System

- Building a custom operating system from scratch, working on kernel development, memory management, process management, interrupts, and system calls.

AI Resume Shortlisting System

- Developed an AI-powered prototype for automated resume analysis and candidate shortlisting.
